ICER'S INC. has produced the number one anti-skid detachable safety soles in the world for the last 20 years. We have supplied letter carriers, construction workers, outside city workers, hikers, farmers, forest workers, rescue workers, military and police, fire fighters, fishermen, hunters, joggers, rink employees as well as the petroleum industry, in fact anyone who needs traction in outdoor icy and slippery conditions. There are thousands of pairs of **ICER'S** in the market place which are still in use after many years. Cleats are replaceble and should be examined for wear and replaced when necessary.

More and more people have been using our product in extreme conditions. This has prompted us to produce a second model of **ICER'S**, **ICER'S XT™** for those people whose situation demands performance far beyond normal use.

We have produced **ICER'S XT™**, specifically for that purpose. The new **XT** features inserts designed to keep studs in place no matter what the conditions. This new version is designed like the original to provide a good fit, insulation from the snow and ice, flexibilitiy and extraordinary grip. Like the original it is a high quality product with the highest quality materials and workmanship. Owners of **ICER'S** products can expect years of use.

ICER'S can prevent injury as well as removing much of the strain and effort from hiking or working in rough and slippery conditions. Secondary value of wearing **ICER'S** is the reduction of wear and tear on expensive hiking and other outdoor footwear. The wear is transferred to **ICER'S** which is designed to take a great deal of punishment.

If you are a very active outdoors recreationalist or someone who works outdoors in difficult situations, **ICER'S XT™** is for you.

Note **ICER'S** are designed for outdoor use only. They are not suitable for extremely smooth surfaces such as steel, marble or tile. Although **ICER'S** are designed for safer walking, caution must be used in extremely slippery situations.
